## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-35, drawn to a method of operating a hand-held mobile device such as mobile telephone that include displaying a soft-key indicator on a display of the mobile device while displaying a telephone number in a an input field for receiving a telephone number input by a user using an input device of the mobile device, classified in class 455, subclass 550.1.
  - II. Claims 36-71, drawn to a method for operating a hand-held mobile device such as a mobile telephone that include displaying a hyperlink on a display of the hand-held mobile device based on acquired information, the hyperlink indicating a location of the hand-held mobile device to a user of the hand-held mobile device, classified in class 455, subclass 456.3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of operating a hand-held mobile telephone by providing a softkey including displaying a softkey indicator on

the display while displaying a telephone number in an input field, the softkey indicator indicating a currently assigned one of a plurality of softkey actions on a browser does not the details of displaying a hyperlink on a display of a hand-held mobile device based on acquired information with the hyperlink indicating a location of the hand-held mobile device to a user of the hand-held mobile device. The subcombination has separate utility such as location monitoring or location based personal service.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Jordan Becker on 14 October 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
